DID YOU KNOW?

A report by Statistics Canada found that water quality was “poor” or “marginal” in 23 per cent of sites tested, mostly because of phosphorus from sewage, agriculture runoff, and industrial waste.

An estimated 10,500 different chemicals are used in cosmetics, skin-care treatments, and other personal products. 200 of those chemicals were found in the umbilical cord blood of newborns in a recent study.

Mobile phones expose our bodies, especially our brains, to direct electromagnetic radiation.

An estimated 4 billion people worldwide use mobile phones. As many as a third of those people are children.
